

R

Jamestown Residence

Construction of a 4200 s.f. home on a wooded site. This project involved some extensive site preparations which included ledge removal. The foundation is waterproofed with a membrane and is surrounded by a perimeter drainage system. The exterior walls are clad with red cedar shingles and to a large extent, stone veneer. The chimneys are also clad in stone. The drive in garage is flanked by reinforced concrete retaining walls with a stone veneer and blue stone caps. There is a four story maple stair case in the center of the structure that leads to a tower and deck fifty two feet above grade from which one can view Narragansett Bay. The interior has maple flooring, Italian tile, custom millwork, granite countertops. There are one hundred and eighty windows in this building.

Completion date: November 2003
Architect: William Burgin Architects
